TECHNICAL SKILLS

Languages	Python, Go, JavaScript, SQL, Bash
Frameworks	Django, Django REST, FastAPI, Strawberry GraphQL, PyTest, gRPC, Vue.js
Infrastructure	AWS (EKS, Kinesis, Athena, Lambda), Docker, Kubernetes, Temporal, Celery, RabbitMQ
Databases & Arch.	PostgreSQL, Redis, Supabase, Event-Driven Architecture (EDA), CDC, Event Outbox

EXPERIENCE

Senior Backend Engineer — Grepsr

May 2023 – Present

- Architected and actively developing an AI-powered SaaS subscription manager utilizing **LLMs** to parse invoices, integrating with **Plaid** and Google/Microsoft Workspaces for automated data ingestion.
- Implementing a fault-tolerant backend using **FastAPI, Strawberry GraphQL, and Supabase**, leveraging **Temporal** and the **Event Outbox pattern** for highly reliable webhook processing.
- Architected the backend infrastructure for **Pline** (Browser Extension), implementing Event-Driven Architecture with **Event Outbox, CDC, AWS Lambda, and Temporal** to guarantee reliable data delivery.
- Enhanced and scaled the core **Grepsr Platform** by migrating critical data lifecycles to **Temporal** workflows, ensuring fault tolerance and high system availability.
- Engineered high-throughput data pipelines using **Apache Flink and Amazon Kinesis**, enabling real-time ingestion and processing of large-scale datasets.
- Optimized data operations by integrating **Amazon Athena** and Go-based microservices for automated exports, significantly reducing processing time.

Backend Engineer — Level9 Tech

Sep 2019 – May 2023

- Architected the backend for **MeroSikha**, a Learning Management System (LMS), implementing real-time student progress tracking and personalized content delivery using Django and React.
- Developed the API and admin platform for **Super Krishak**, an agriculture app, implementing asynchronous background tasks using **Huey, Redis, and Docker**.
- Developed the API infrastructure for **Online Travel Nepal**, integrating **Sabre GDS** and multiple payment gateways to facilitate real-time flight and hotel bookings.
- Mentored a team of junior developers and interns, introducing code review standards and CI/CD practices that accelerated team productivity.

Python/Django Developer — Magdotnet

June 2018 – Aug 2019

- Built the **RhinoPass** online ordering system using Django, PostgreSQL, and Docker, creating a scalable solution for high-traffic business usage.
- Launched **Photo Agent**, a full-stack e-commerce platform allowing photographers to monetize event photography via secure, client-specific sharing portals.
- Engineered an automated email marketing system and online ordering engine serving multiple business verticals, streamlining campaign management.
- Developed a real-time appointment scheduling platform and orchestrated cloud deployments using Bitbucket Pipelines.

Python/Django Developer — Aayulogic

Sep 2016 – Nov 2017

- Led the critical migration of **merojob.com** (Nepal's leading job portal) from legacy PHP to **Python/Django**, resulting in significant performance gains and improved code maintainability.
- Developed core HR management modules for **RealHRSoft**, enhancing payroll and attendance capabilities for enterprise clients.
